# ECO BUILDING CEMENT

## LEADING THE WAY IN ENVIRONMENTAL STEWARDSHIP

AfriSam's Eco Building Cement is the most environmentally responsible cement available, with a Carbon Footprint less than half the world average, exceeding the SABS quality requirements for cement in this strength class. It's easy to work with, gives a smooth finish with excellent long-term strength and durability, making it ideal for large and small projects. This specially blended, high quality cement, engineered to the most stringent industry standards, is the result of extensive research and development by the leading construction materials group. It is backed by AfriSam's reputation for first-class products, quality control, sales support, technical service and supply infrastructure. Eco Building Cement is available in the greater Gauteng area in traditional 50kg bags as well as convenient 20kg bags for easy handling and minimal wastage.

Insist on Eco Building Cement and help build a better future for ourselves, our children and generations to come.

## Recycle Bad News Into Opportunity

Get Natural Climate Comfort for indoor temperature control without heating or cooling

- Save electricity - proven
- 100% green credentials
- Every bag installed means a bag of newsprint waste recycled for life
- Excellent insulation against heat, cold and noise. R-value 0.038 w/m.K
- 100% coverage - highly cost effective
- Professionally & efficiently installed
- SABS - Approved
- Fire-rated - No Spread of Flame
- Cool in summer - Warm in Winter

Shift the spiraling energy cost paradigm today. Insist on Eco-Insulation™ Cellulose Fibre Ceiling insulation for your roof or cavity.

Make the Shift now.

Save Electricity & Recycle. For You. For the Planet.
